

Extension Setup Guide

Step-by-step instructions to install and configure the HackerRank Contest Tracking Extension

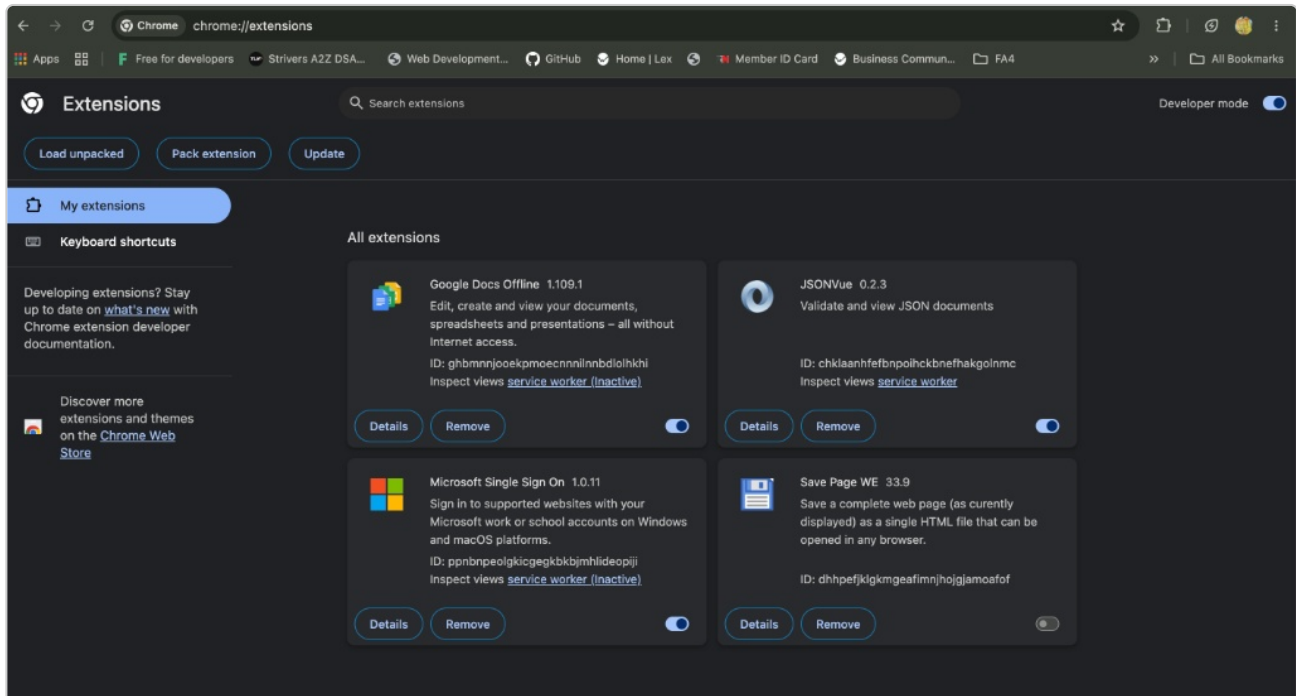

Step 1: Extract the Extension

Unzip the extension folder and keep it ready on your local machine.

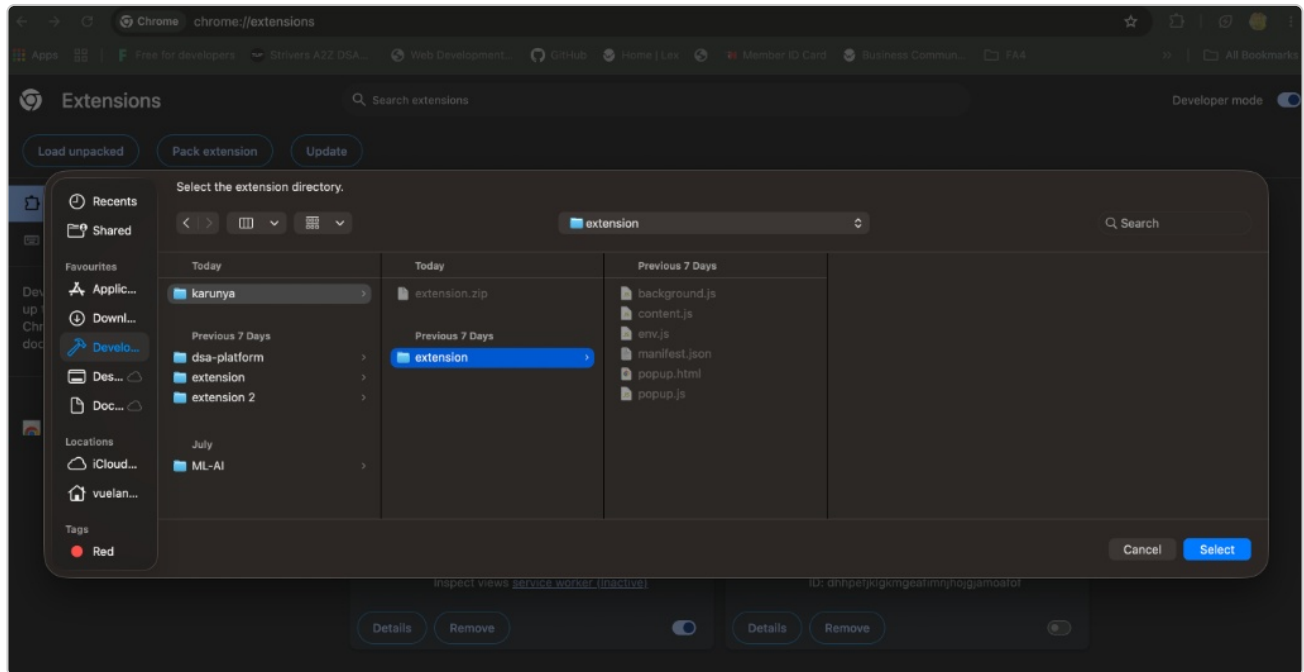

Step 2: Enable Developer Mode

Open your browser's extensions page (navigate to `chrome://extensions`) and enable **Developer mode** using the toggle in the top right corner.

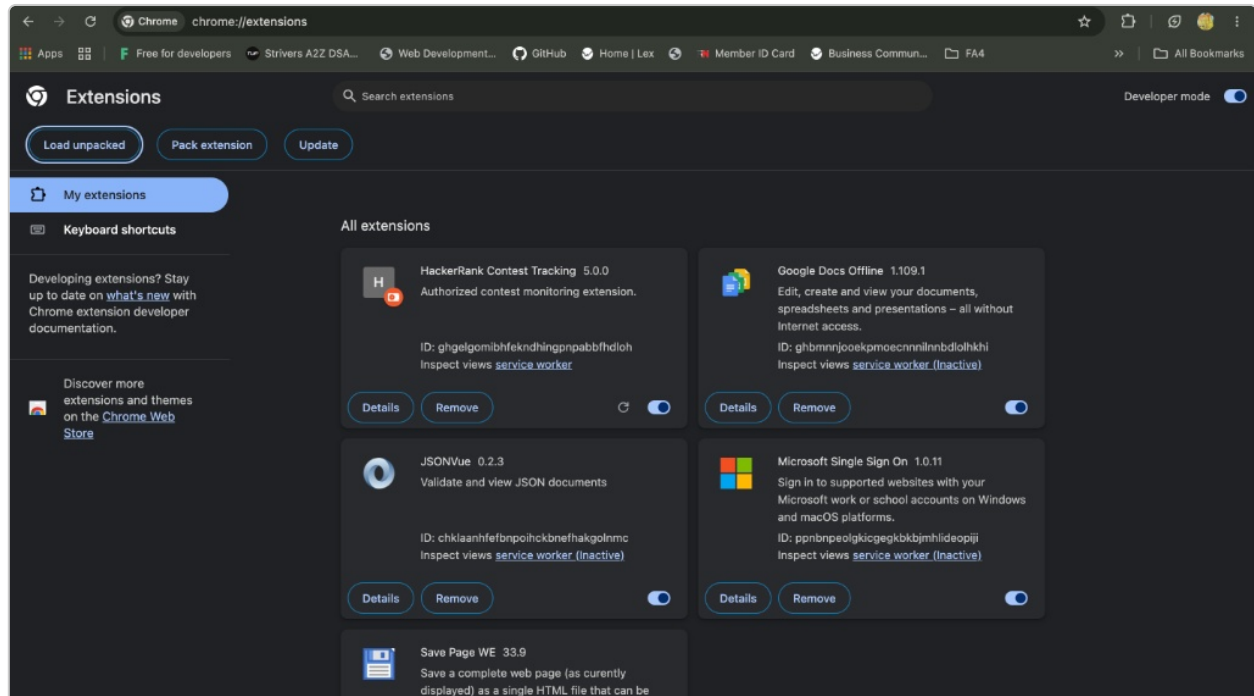

Step 3: Load Unpacked Extension

Click the **Load unpacked** button and select the unzipped extension folder to add it to your browser.

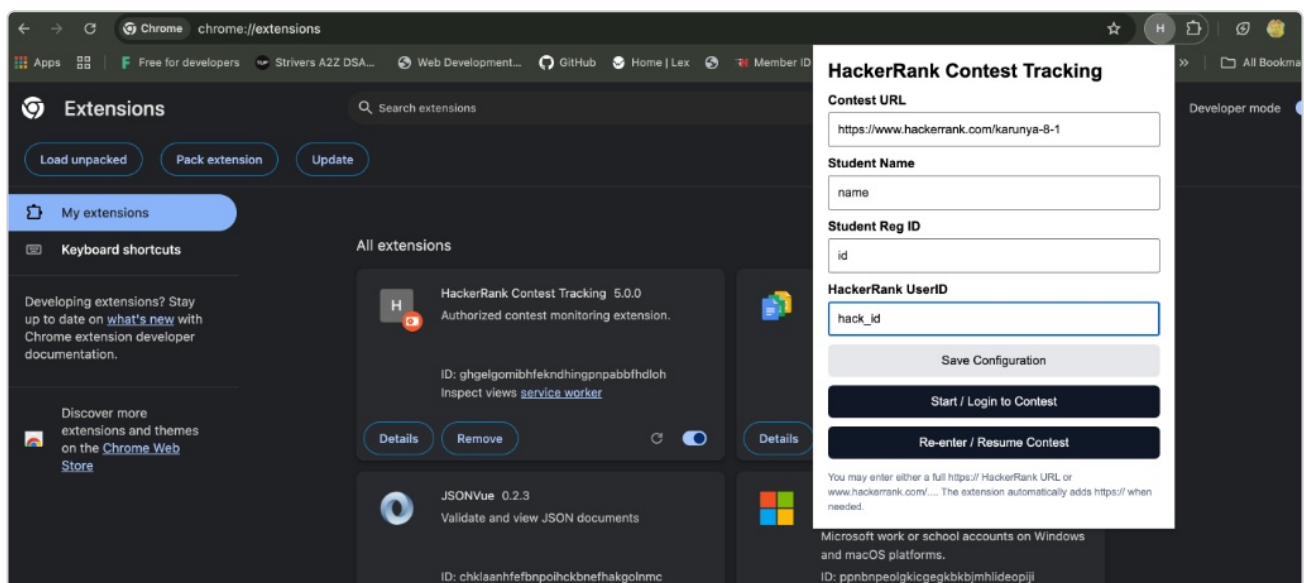

Step 4: Verify Installation

Once done, you will be able to see the extension successfully added and enabled in your list of extensions.

Step 5: Configure and Start

Click the extension icon in your browser toolbar. Enter the contest URL, your name, student ID, and HackerRank ID. Click **Save Configuration**, and then click **Start / Login to Contest**.

Once done, the contest will be opened in full screen mode. You can now start coding!

 Important Note

Don't switch tabs, switch windows, or escape fullscreen mode during the contest, as it will negatively affect your score.
